Delhi, India | +91 7999902865 | ak71901@gmail.com | linkedin.com/in/amit-kumar-5540a3223 | Portfolio

PROFESSIONAL SUMMARY

Product professional with 6+ years in tech across UI/UX, product design, and enterprise automation, including 2+ years owning the B2B SaaS application as Product Manager. Experienced in roadmaps, RICE prioritization, API integrations, data-driven discovery, and AI/RAG solutions with measurable operational impact.

SKILLS

Product Management: PRDs, User Stories, Acceptance Criteria, Technical Specifications, API Integrations, System Workflows, Roadmaps, MVP Definition, Feature Prioritization, Product Lifecycle, Product-Market Fit

Technical & Data: SQL, Mixpanel, Amplitude, Google Analytics, REST APIs, Data Flows, System Dependencies, RAG/LLM Applications, n8n, Funnel Analysis, Feature Adoption, Retention, Product KPIs

Execution: Agile/Scrum, Backlog Management, QA, Release Coordination, Stakeholder Management

Design: User Research, UX Strategy, Prototyping, Usability Testing, Figma, XD

PROFESSIONAL EXPERIENCE

Amazin Automation India Ltd | Product Manager (official title: Product Designer) **Sep 2024 – Present**

B2B SaaS Application — B2B logistics platform for cement and oil & gas plants (owned end-to-end for 2+ years)

- Own the SaaS application end-to-end: roadmap, planning, and RICE prioritization; led market assessment via TAM analysis, competitor benchmarking, ROI modeling, and customer validation.
- Led delivery of the Business workflow across web and mobile Application, replacing spreadsheet and email processes; aligned Team Members (procurement, operations, engineering, and compliance) and validated via scenario-based usability tests and a parallel pilot.
- **Results:** 40% faster business workflow, 70% participation on web and mobile Application, 30% lower cost variance, zero dispute escalations and 80% automated business workflow.
- **Integrations:** Designed API specifications and integrated APIs across the web and Mobile application to enable seamless data synchronization for orders, vendors, invoices, and other business entities.
- **Data:** Used SQL to track funnel drop-off, timing, and feature adoption that refined confidence indicators and messaging before rollout.
- Shipped enterprise workflow automation features that reached 70%+ adoption within 90 days of launch.
- Built a governed Figma design system across 10+ developers and stakeholders; mentor 2–3 junior designers on design quality and AI-assisted workflows.

AI Assistant for saas Application — Prompt-Based Workflow Chatbot (n8n, RAG, LLM)

- Built and integrated an AI chatbot so User complete daily tasks activity, such as vehicle track details, plant workflows and many more things through natural-language prompts instead of navigating multiple screens.
- Built the pipeline on n8n with RAG (Nvidia Nemotron, Nvidia Nemotron 550b, 550-character chunks with 50 overlap), connected with REST APIs for live. chose RAG over fine-tuning to keep answers current without retraining.
- Defined evaluation criteria for response quality, hallucination rate, and citation accuracy, with human review for decision-critical outputs. Reduced research effort by 60%.

People Tech Group | UI/UX Developer **Apr 2023 – Mar 2024**

- Designed web and mobile workflows from user flows to high-fidelity prototypes; partnered with stackholders to reduce rework by 25%.

Zeemo Pvt Ltd | UI/UX Developer **Aug 2022 – Mar 2023**

- Owned design-to-development handoffs for customer-facing applications, supporting responsive, cross-browser, component-based design.

Netlink Software | Teleperformance | Quess Corp | Early Career **2019 – 2022**

UI/UX Design Intern, Customer Support Executive, Giga Fiber Engineer

EDUCATION & CERTIFICATION

B.E., Electronics and Communication — RGPV, Bhopal **2015 – 2019**

Product Management Fellowship — Nextleap Fellowship Program **2026**
